Subject: RE: EPA OEM info needed today!
Date: Wednesday, May 08, 2013 5:04:32 PM

All:

I talked with Janet earlier today. She was in a hurry because her commissioner wanted this information within about 30 minutes. I told her about Tier II reporting, and RMP (the best I could) and then passed it on to Susan Webster via telephone. Susan indicated that she would contact Monica and give Janet a call back ASAP. I am assuming that Susan/Monica have the lead on this as I am in the field in Houston on a job site.

I hope she was able to satisfy her commissioner.

Thanks

Steve, didn't see you on the list and thought you might have additional info regarding a requirements under EPCRA.

Eugene, I am not aware of any pesticide related requirements regarding AN as a fertilizer unless the AN will be mixed with a pesticide. In that case the facility would have to register as a Pesticide Producing Establishment. Are you aware of any?

Gary, are you coordinating the response?

Subject: EPA OEM info needed today!

We are in need of knowing all of the agencies that would need to be contacted if someone were to start a fertilizer business handling AN. TDA Commissioner is addressing an audience **today** and needs to have this answer.

Since TDA is not the expert in this area and it doesn't look like the Feed and Fertilizer control service has a comprehensive list of agencies either, I am hoping you can help me out.

So far, I have:

State:

TX Feed and Fertilizer Control Service: Register the facility, register products, recordkeeping.

Local Fire Marshal: Provide list of chemicals on site upon request.

Federal:

EPA: OEM: Tier I or Tier II reporting for petroleum products above ground storage

DHS: Register facility, register purchasers of AN, background checks, recordkeeping (did this proposed rule ever go final?)

I know there is more but I am searching for information. There is no one stop shop for this type of info

that I can find. If there is anything you can add to this, PLEASE DO! I want this as accurate as possible.

Thank you so much.
